

# ZEOM.net™ Real-Time Pricing

ZEOM.net™ is an operations infrastructure that converts raw operations data from your organization's remote locations into meaningful, actionable information. Designed for field, corporate, and site personnel, ZEOM.net supports tactical business operations decisions, including alerting managers to problems that arise at remote locations and enabling them to address those problems in real time. In addition, ZEOM.net's timely, accurate operations information supports strategic decision making with real-time and historical information as well as trend analysis.

ZEOM.net Real-Time includes all base-level ZEOM.net functionality. It requires a POS integration module and persistent Internet connection.

## System Requirements

### ZEOM.net

Hardware and implementation costs outlined below are included in the monthly subscription. Additional video cameras and/or cable runs are available for an additional fee.

- 1- Preloaded Communications Device with 56K Frame Router Card\*
- 1- Axis Internet Camera
- Cables, Wires, and Server Mounting Hardware
- Staging and Implementation Performed by IBM Global Services
- 2- Cable Runs

\*Router card for use with 56K Frame Relay connectivity. xDSL, ISDN, VSAT, or other Internet options may require an alternate card.

Cost of hardware and software used for website access is not included in the monthly subscription. The customer must provide the following for each user:

- A Browser-enabled Device (PC, Cellular Phone, Personal Digital Assistant)
- Internet Explorer 4.x or Netscape Navigator 4.x
- Internet Access

### Extensions

The speed of service, food safety, and device monitoring extensions to ZEOM.net include information collection and data warehousing, alerts, reports, and OLAP access to stored information. Prices quoted here do not include the cost of hardware or hardware installation.

#### Speed of Service Solution

Speed of Service Drive-Thru Timer

# IntelliKitchen® Suite Retail Price List

IntelliKitchen® offers operators in the food service industry a full-featured kitchen management system designed to support the order life cycle through the capture and automation of existing, effective operational processes.

IntelliKitchen accelerates workforce speed and efficiency, improves order accuracy, increases line productivity and ensures compliance with food quality standards. Unique IntelliKitchen functionality includes optimal order sequencing, dynamic load balancing, state awareness, pull workflow, and simultaneous finish. The application is built on a unique foundation technology that enables one-point integration with legacy POS systems.

## System Requirements

### Production Manager

Minimum recommended hardware requirements for a typical installation using three kitchen monitors follow. Use of optional features, transaction volumes, and actual number of kitchen monitors are key performance factors.

### Server

333+ Mhz (Certified for Use with NT)  
128 Mb Recommended (256 Mb for Windows 2000)  
100 Mb Free Disk Space  
Windows NT 4.0, NT Server 4.0, Windows 2000  
Open RS232 Serial Port (for IBM Configuration)

### Display

#### IBM Configuration

3- 1256 I/O Units  
1- 1255 Control Unit  
3- 1252 Bump Bars  
3- VGA Monitors  
4- 2900 Power Supplies  
(1 per Controller/ I/O unit)  
4- RJ45 Cables  
1- Straight-Through Serial Cable

#### SEC Configuration

3- VGA Kitchen Monitors  
1- OAsys Box (Ethernet, Max. 3 VGA Ports)  
1- Power Supply (for OAsys)  
3- SK9200 Bump Bars  
1- Ethernet Hub 10 Mbps (or 10/100)  
1- Ethernet Hub  
CAT5 Cabling between Hub and Ethernet Devices  
(CPU, OAsys)

### Production Manager Advanced Workflow Extension (Wrapper Seal Printing)

Serial Wrapper Seal Printer (Monarch 9414 or Epson TM88-II Compatible)

### Scanning Support Extension (Barcode Type: Code 39)

Serial Wrapper Seal Printer (Monarch 9414 or Epson TM88-II Compatible)  
Serial Scanner (Symbol LS9100)

### Order Confirmation Board Extension

Texas Digital AccuView or AccuOrder Order Confirmation Board  
One Free Serial Port in the IntelliKitchen Server for Each OCB Device

### Production Manager

\$ 1,095

Workflow routing; configurable monitor and view display; state awareness; performance monitoring; speed-of-service log; accessory generation; bag size generation.

### Production Manager Advanced Workflow Extension

\$ 995

Simultaneous finish; item view; wrapper seal generation.

### Bin Manager

\$ 495

Bin status display; shelf life tracking; automated make and discard orders.

### Sidework Manager

\$ 295

Scheduled, event-driven or informational message types; configurable display modes.

### Order Confirmation Board Extension

\$ 495

Information flow and display management interfaces to legacy POS and OCB systems.
