

Have You Taken the Apigent Challenge?

control labor costs

enhance customer satisfaction

After-the-fact reports are no way to manage sales and labor at your remote sites. Information that comes a week later—even a day later—won't help you undo poor customer service, low sales, overstaffing, or minor violations. What would it be worth to respond to potential problems as they unfold?

We can help you measure the impact of real-time information on your business. It's easy. Just try our turnkey ZEOM.net™ solution in your six-store district for sixty days and we'll show you documented results.

Imagine doubling the number of stores your field staff can supervise. Eliminating hours of management paperwork. Boosting same-store sales. Getting labor right. These are just a few of the benefits our customers receive from ZEOM.net.

drive profitability

reinforce positive employee performance

Make better decisions.
Take better action.
We dare you.
